## *Formal Falls for Formal Walls*

FormalFalls has been designed to work with most every retaining wall manufacturer to add a lighted sheer waterfall in any landscape. The FormalFalls has a low-energy, color-changing, remote controlled, LED lighting system that creates a beautiful nighttime display. The FormalFalls basin was designed to create an easy way to install the system within a block wall structure. The use of the autofill kit virtually eliminates all maintenance for the consumer.

## How does it work?

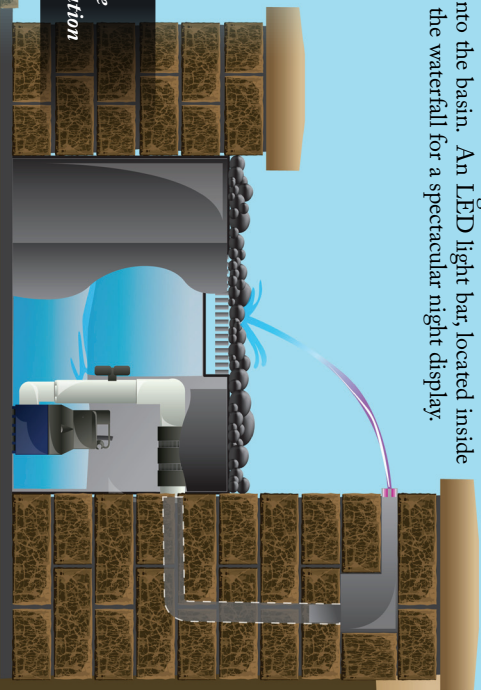

The Formal Falls molded Basin is placed on a suitable base with the pump protected inside the basin. Wall block or other suitable material is stacked all around the molded basin. The Formal Falls spillway rests inside the wall block and is covered. The pump inside the basin pumps the water via tubing to the Formal Falls where the water returns via a waterfall into the basin. An LED light bar, located inside the Formal Falls unit, illuminates the waterfall for a spectacular night display.

## Benefits:

- Stainless Steel Construction
- Color Changing: 16 Colors
- Self Draining: Simple to winterize
- Manufactured in the USA
- Remote Controlled Lighting
